

# WELCOME TO THE FUTURE OF IT SUPPORT

## ABOUT VELOCITY SMART TECHNOLOGY

We are IT support guys and Techies with over 50 years experience working for both IT companies and businesses. We are fanatical about one thing: designing Smart Technology which frees you up, to be able to deliver more.

We all experience wasted time, cost, and effort in collecting, delivering or dropping off items, either at home or in business. Velocity Smart Technology designs solutions that automate and re-imagine each of these experiences.

Much as Uber isn't a Taxi firm, we are not "locker manufacturers"; we are IT and Digital experts that work with all the leading Smart Locker global manufacturers to create effective enterprise grade business solutions. We work with and help transform many global companies and live and breath the problems and challenges modern IT Service Delivery teams face within these organisations.

We know what works and what does not, which is why we continue to work hard to create a Smart Locker solution that truly solves the real-world problems facing IT support teams today.

We have always had one simple vision:

# To improve the world in which we work.

Our goal is to enable you to provide your users the same modern, frictionless levels of service that we have come to expect in our personal lives. With the launch of Velocity Smart Technology™ this vision is now a reality.

We have spent over 5 years working with customers and partners, understanding the way modern Digital Workplace Support teams need to operate, so that we were able to provide you with the best possible Smart Locker and Smart Vending solution available to enterprise IT today.

Say hello to the future of work.

# INTRODUCING VELOCITY SMART TECHNOLOGY

# VELOCITY MANAGEMENT TEAM

VELOCITY SMART  
COLLECT™

We've created world's first  
ServiceNow certified Smart  
Locker & Smart Vending  
Application.

WE ARE CARBON  
NEUTRAL

We carbon offset all emissions  
generated by our company and  
the devices we sell each year.

**Anthony Lamoureux**  
Chief Executive Officer

A veteran IT director with over 25 years experience, Anthony has had a career as Programme Director and Head of IT. After honing his skills within blue-chip IT firms, Anthony went client side, delivering transformation for brands including Gatwick Airport, Reckitt Benckiser, Centrica, and Co-op Bank.

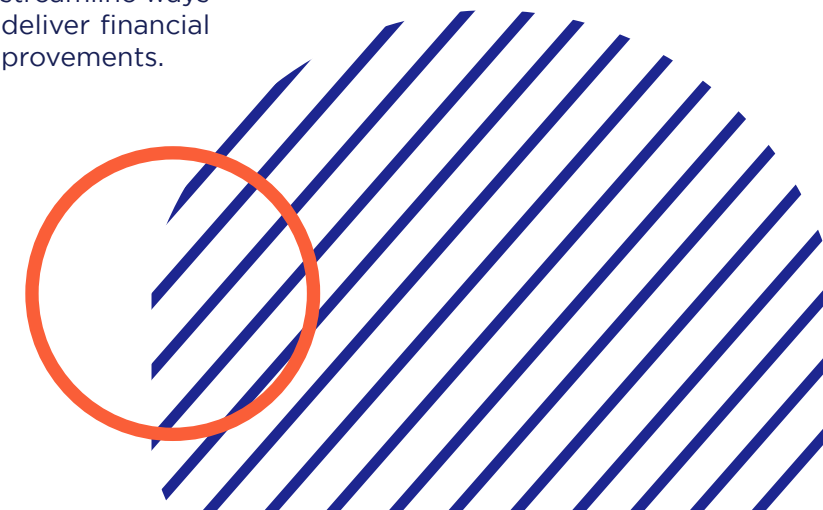

**Stuart McDonald**  
Chief Operating Officer

Stuart is MBA qualified, learnt the ropes working for traditional consultancies and has over 15 years experience working with global brands including Gatwick Airport, Trinity Mirror and the International Olympic Committee to streamline ways of working to deliver financial and service improvements.

**Lyubo Chavdarov**  
Chief Technology Officer

Lyubo brings over 10 years expertise in leading dynamic technical teams that deliver innovative digital solutions within the IOT space. He is currently leading and growing our Bulgarian "Velocity Labs" product development team.

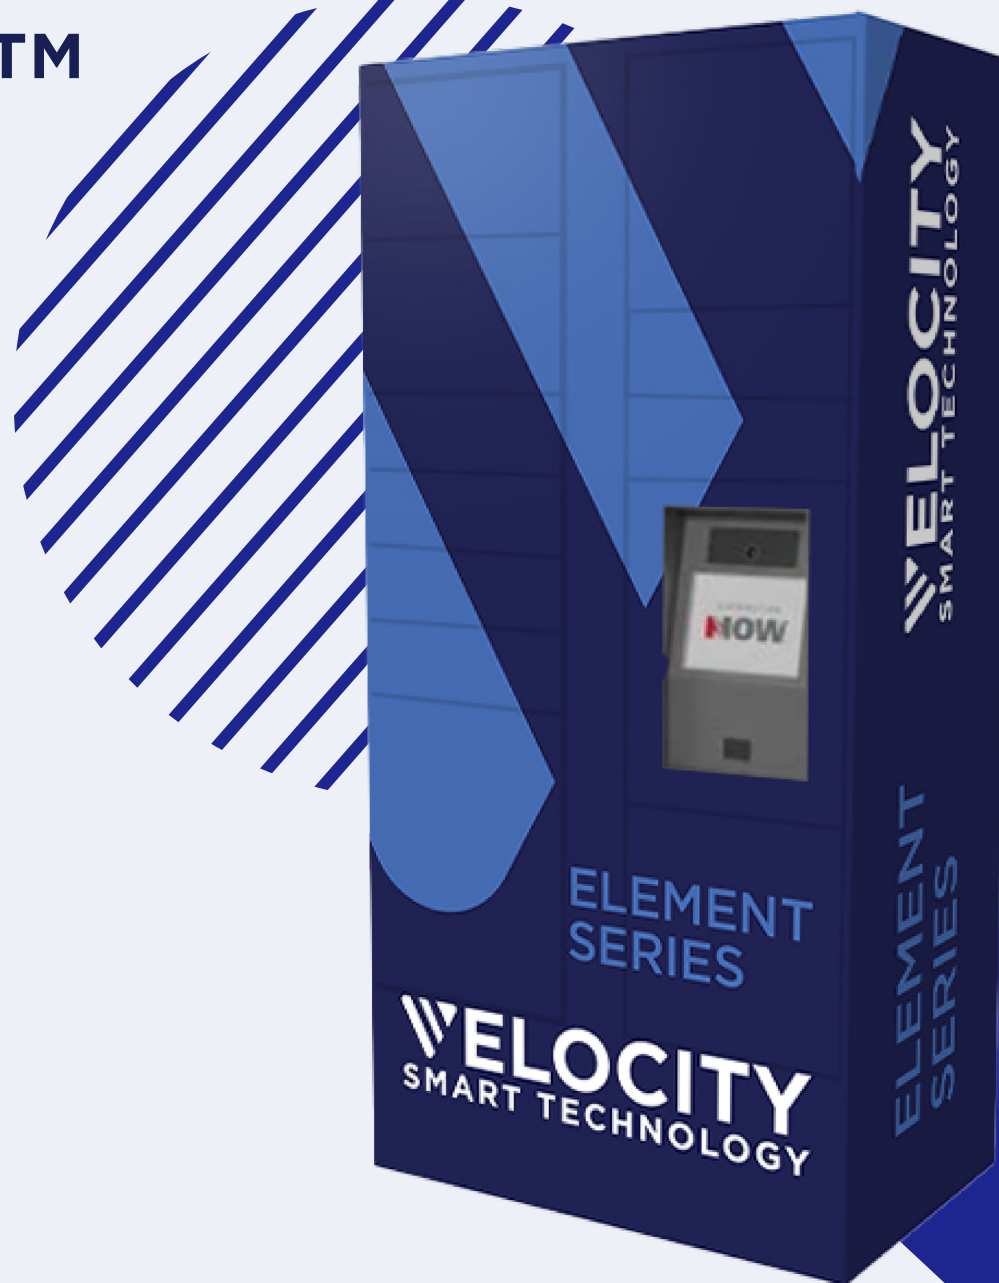

# VELOCITY SMART LOCKER™

**The Velocity Smart Locker™ range represents the pinnacle in Smart Locker versatility and features.**

Manage your most valuable equipment including laptops, with the Velocity Smart Locker™ range, which represents the pinnacle in our Smart Technology range.

We designed every aspect of the Velocity Smart Locker range to be simple, reliable and multi-functional. With the lowest mean time between locker failures we have ensured that our Smart Lockers give you the enterprise level of reliability and performance you need.

The Velocity Smart Locker™ range has a growing range of 3 different Smart Lockers to suite different operational needs, which are available in from 5 to 34 doors, and with a wide range of compartment sizes, there are 1000's different Smart Locker configurations

When combined with the Velocity Smart Collect™ app, the level of customisation that our solution offers is limitless.

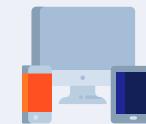

With Break-fix forward stocking, Borrow & Return, Personal package Deliveries, New Starters, Roll-outs, Satellite offices use cases already available, you can create any number of new use cases with our Smart Collect™ App. Our multi-configuration, multi-function, multi-use Smart Locker makes Velocity Smart Lockers™ the perfect addition to every modern office and Digital Workplace service, no matter the size or location.

## VELOCITY SMART LOCKER FEATURES

### Configurable

From 3rd height to full height, 5 doors to 34 doors, with over 100 combinations.

### Versatile

For laptops, spares, cables, access cards, keys, and non IT equipment. Be creative!

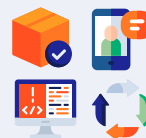

### Multi-Input

With RFID, barcode and pinpad access, each Smart Locker offers maximum flexibility.

### Daisy-Chain

Multiple lockers can be linked to a single controller.

### Multi-Usage

Break-fix, Borrow & Return, personal deliveries, new starter, Rollouts, satellite offices, you can build any number of new uses with our Smart Collect app.

## Element Spark Series

Our vision has always been to automate every possible part of the IT equipment provisioning process. We believe that if a laptop is in one of our lockers, all the other steps in getting a laptop built, patched and collected by a user should be fully automated.

And the first big milestone in this journey is to have a Smart Locker capable of charging laptops, smartphones and tablets with wired network connectivity which can allow laptops to be quickly imaged, patched or repaired.

Which is why we have developed the Velocity Smart's new Element Spark series – the world's first ServiceNow app connected SmartLocker with combination mains and USB power and fully managed network connectivity. available.

### VELOCITY SMART ELEMENT SPARK GIVES YOU THE POWER

#### Always Charged

Automatically select charged devices from the locker.

#### Networked

Use wired network connectivity to manage device builds and patches.

#### Future Proofed

Element Spark is for the arrival of Smart Collect™ ServiceNow app controlled automated device provisioning features.

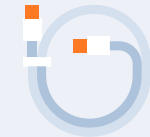

ELEMENT  
SPARK  
SERIES

### ELEMENT SPARK FEATURES

#### AC Mains Charging

20 charging locker cells with AC Mains power, ideal for charging laptops and chromebooks.

#### USB Charging

USB Type-A 2.1A charging ports for charging tablets, smart phones and other handheld devices.

#### Network Cabled

RJ45 CAT6 network port to enable laptops full LAN network speed connection.

#### Managed Switch

Internally mounted 19" Network Switch slot enabling you to install corporate chosen network switch.

#### Active Cooling System

Built-in super quiet active air filtration and blower system.

#### Smart Collect™ Managed

The Element Spark series is fully integrated to Velocity Smart Collect™

#### Extendable

Ready for all planned future software updates.

## VELOCITY SMART VENDING FEATURES

### The big one

With 60 slots, Velocity Smart Vending machines can hold up to 1800 items, reducing restocking visits, ideal for keyboards, headsets, phone cases, cables...

### Multi-Input

With RFID, barcode and pinpad access, each Smart Vending machine offers maximum flexibility.

### Verified Vend TM

Patented Verified-Vend technology senses and confirms each vend transaction.

### Configurable

Adjustable shelf height and tray configurations adapts to wide range of item sizes and shapes.

### Report & restrict

The Velocity Smart Collect app ensures stock and transactions are reported. Only authorised people can select allowed items, with ability to restrict re-request frequency. Includes stock tolerance and restocking alerts.

# VELOCITY SMART VENDING™

**Velocity Smart Vending™ is the workhorse in the Velocity Smart Device range, with extra large capacity for all your smaller items and peripherals.**

With 60 slots, holding up to 1,800 items and vending each of them first time every time, the Velocity Smart Vending™ machine is the workhorse of the Velocity Smart device range.

Velocity Smart Vending™ is ideal for all of those low value, but often essential items like keyboards, headsets, charging cables phone cases, power banks and power supplies which your business needs every day - now available at the touch of a button.

We carefully selected our Velocity Smart Vending™ technology to ensure that it did not have single points of mechanical failure (as robotic arm vending solutions do).

As part of our device setup testing and configuration, we customise the Velocity Smart Vending™ item configuration to vend your chosen items, optimising the configuration to ensure maximum item density taking

into account item packaging, size and weight distribution.

Each machine benefits from Verified Vend™ technology, which senses when items have not been vended successfully and then gently ensuring the item is re-released; so no more calls to your teams from frustrated users waiting for their equipment.

Through the Velocity Smart Collect™ App you receive reports and alerts on stock levels to ensure that each device maintains the optimum level of items.

Used on their own or alongside our Velocity Smart Lockers™, Velocity Smart Vending™ ensures your teams always has access to the equipment they need to your business running smoothly.
